

Mark + Print + Verify

Intuitive, touchscreen ballot marking device (BMD) with a voter verifiable paper summary.

Absolute Transparency – Voters verify a printed, full-size, human-readable ballot summary before casting. Verity never encodes voter selections in a barcode for tabulation.

Elections Reimagined

The New Voter Experience (VX)

- ▶ Seamless, Efficient, Modern
- ▶ Accessible technology that adapts to me
- ▶ Humanly Verifiable - Humans do not read barcode.
- ▶ Trusted process, Verifiable results

Working side-by-side with election professionals for more than 100 years, Hart is committed to helping advance democracy one election at a time.

Hart's mission fuels our passionate customer focus and a continuous drive for technological innovation. The result is Verity® – truly different election technology. Reimagined from the inside out, Verity Voting promises to provide jurisdictions with a future-proof investment in secure, transparent voting.

Citizen Voting Experience

That Was Easy

Voters mark and print ballot with Verity Duo, review, and feed the ballot record directly into Verity Scan. Green landing lights, on-screen directions, and tactile guides instruct the voter when and where to insert the ballot into Verity Scan.

I Could Read My Choices

Duo provides *the only* ballot summary with a word-for-word legible record of voter ballot choices by contest, name of candidate and party, a bilingual ballot summary, and tabulates from the same human readable information the voter verified, *not a barcode*.

Everyone Could Vote

Complies with ADA standards, with controls in easy reach of users in a seated position. Only Verity uses AIGA Design for Democracy templates.

Every Device Can Be Accessible

Every Verity Duo works with Verity's Audio Tactile Interface. No need to track and deploy separate accessible units.

Verity is Designed for Everyone

Verity technology is equipped with a full suite of accessibility features to ensure every voter can vote privately and independently.

Election Administration Experience

Completely Auditable Paper Trail

Duo provides the *only* ballot summary and tabulation from the same human readable information the voter verified, not a barcode.

Better Ballots

Full size ballot summary protects information integrity. No illegible, shrinking fonts, real estate lost to barcodes, cut off words, or awkward alignment of contests and selections that impact auditability.

Cost-Effective

Fewer consumables. No toner. No ink cartridges. Vote records print on thermal paper for easy upkeep.

Compact

Easy to store, transport, and set up. Lightweight and compact, Verity transports securely in standard vehicles.

Duo Partner Products for Added Benefits

Verity Controller with AutoBallot

High traffic polling places or vote centers? Streamline your operations and pair Verity Duo with Verity Controller for centralized polling place management.

Verity Duo Go

The first and only purpose-built device of its kind, Verity Duo Go delivers a portable voting technology that guarantees every voter a paper vote record, even in their vehicle.
